

Dear Parents and Carers,

Last night's announcement that all schools are to close this Friday has caused many people to question what will happen next with regards to your child/children's schooling.

Here at St. Edmund's, we have decided to introduce the use of 'Seesaw' to aid our children that will be continuing their development and learning at home. Some of you may be familiar with this application as we have used it in the past. However, we feel that now is an appropriate time to re-ignite its use as it will allow us to share your child/s experiences as well as keep you informed with daily updates from school.

The 'app' allows us to be in direct communication with one another via a message service, this is important to us as it will keep all vital communications flowing. It also gives you the opportunity to share your child/s learning via a photo/video/drawing etc straight to the class teacher. This will be wonderful for us to see all the great things your child/children will be doing at home to enhance their education and experiences at this time.

You will need to download the 'seesaw for family' app for IOS or Android and enter your child's unique QR code. This will give you a direct link to their account and to their class teacher. You will be sent two copies of this code...As we know that things can go missing from time to time!

As a school, we think this will be a fantastic way that you can share with us your child's progression and their new, alternative learning experiences they will encounter from home. We know that this will be a different situation for many but we feel that this is a brilliant way to still keep in touch and for us to support each other during this time.

Thank you for your continued support,

St. Edmund's Staff.
